Mapping the PASS Drive Using the VPN Client (Mac)

1. If you do not already have the VPN Client installed please install it here:
   http://www.hhdev.psu.edu/iss/help/vpn.html

2. Open the VPN Client and select ISP to PSU and click Connect.

3. A logon box will appear after you make the connection. Please enter your PSU Access Account username and Password. Then click Ok.

4. On the Finder Menu Bar, click Go > Connect to Server
5. Enter the network path in the Server Address box. (example: smb://pass.psu.edu/(PSUusername). Click connect

6. In the next box enter your PSU Access account username and password. Click connect

Example: Username: slp281@dce.psu.edu  Password: PSU access account
