Noll Physiological Research Seminar
Noll Laboratory
Department of Kinesiology
College of Health and Human Development

Seminar Room 127 Noll Lab / UP  Friday 11:15 a.m. – 12:15 p.m.

Jan. 11  Exercise Physiology Faculty Candidate
          Lacy M. Alexander, Ph.D.  Assistant Professor, Research Associate
                                Pennsylvania State University

Jan. 18  Journal article discussion  Topic: Dietary Nitrates in Health & Disease
          Kinesiology 590B students only
          Facilitators: Proctor Lab

Jan. 25  Childhood Obesity and Bone Health
          Connie M. Weaver, Ph.D.  Distinguished Professor and Department Head,
                                  Department of Nutrition Science
                                  Director, Women’s Global Health Institute
                                  Purdue University
          Host: Mary Jane De Souza

Feb. 1   Exercise Physiology Faculty Candidate
          Keith Baar, Ph.D.  Assistant Professor
                                Neurobiology, Physiology, and Behavior
                                University of California Davis

Feb. 8   Exercise Physiology Faculty Candidate
          Lance Davidson, Ph.D.  Research Assistant Professor
                                University of Utah School of Medicine

Feb. 15  Journal article discussion  Topic: TBA
          Kinesiology 590B students only

Feb. 22  Local Control of Skeletal Muscle Blood Flow
          Philip S. Clifford, Ph.D.  Professor of Anesthesiology and Physiology
                                Associate Dean for Post-Doctoral Education
                                Medical College of Wisconsin
                                *Also presenting Feb. 21st at Kinesiology Colloquium*
                                Host: Lacy Alexander

Mar. 1   Reversing arterial dysfunction in older women: Is beetroot juice the answer?
          David N. Proctor, Ph.D.  Professor of Kinesiology and Physiology
                                Penn State University
Mar. 8  No seminar
       Spring Break

Mar. 15  Emerging science associating dairy consumption with health and wellness: It’s okay, go to the Creamery!
Jeffrey Zachwieja, Ph.D.  Senior Vice President for Nutrition Research
                        The Dairy Research Institute
                        Des Plaines, Illinois
                        Host: Larry Kenney

Mar. 22  “Aging, Estrogen and Inflammation in the Cardiovascular System”
Anne A. Knowlton, M.D.  Professor, Molecular & Cellular Cardiology
                        Departments of Medicine and Medical Pharmacology
                        University of California, Davis
                        Host: Donna Korzick

Mar. 29  Neurovascular responses to stress in hypertensive adults
Jody Greaney, M.S.  Ph.D. candidate, Cardiovascular Physiology Laboratory
                    University of Delaware
                    Host: Lacy Alexander

Apr. 5  Aromatase inhibitors: A novel emergency contraceptive or a fertility therapy?
Heather Allaway, M.S.  Ph.D. student
                    Penn State University

Apr. 12  Topic to be determined
Rebecca Mallinson,  Ph.D. candidate
             Department of Kinesiology
             Penn State University

Apr. 19  No seminar: Experimental Biology Meeting, Boston, MA

Apr. 26  Journal article discussion  Topic: Female Athlete Triad and Bone Mineral Density
                      Kinesiology 590B students only
                      Facilitator: Jenna Gibbs, BSc.
